SUBJECT: Improvement of "C" Configuration

TO: Contracting Officer

Reference letter No. DPS-1647 dated 23 June 1958 which forwarded the Perkin-Elmer proposal for the improvement of "C" configuration for WSP0 concurrence. This proposal has been reviewed and is approved. The proposed Statement of Work is essentially that discussed on 22 May 1958 with the contractors concerned. It is requested that the contract covering this work be issued at a total estimated cost [redacted]

Dear Sid:

I am enclosing a copy of [] proposal for improvement of the "C" Configuration. You will note that over 50% of the total cost is attributable to Hyeon work.

25X1

We have examined the rates and they are consistent with those currently being approved by []. The profit factor represents [] of the total cost which appears fair and reasonable. The man hours and materials also appear consistent. There is so much trial and error type effort that is very difficult to substantiate. In view of the foregoing, we have accepted the Contractor's proposal without change.

A copy of Hyeon's proposal to P-E is also attached for your information. Exhibit "B" to their proposal is not included since it would not reproduce; however, it is quite similar to P-E technical description.

Very truly yours,

Dan
